Equipment Sales

Edge DPM offers all the major quality brands from the world's leading manufacturers. We supply catering, refrigeration, laundry, warewashing, food preparation, servery equipment and bespoke fabrication made to measure for your kitchen or laundry. Suitability, Energy Efficiency, Aesthetic Qualities, Environmental Impact and Sustainability are all aspects we consider.

EQUIPMENT SALES

Catering Equipment

Edge DPM work with all leading manufacturers across the foodservice sector to provide our clients with the best solution for the task at hand. From one-off product supply to full turnkey projects, we work tirelessly to offer our clients value for money and attention to detail.

Laundry Facility Supply

With over 20 years' experience in the International market, Edge DPM can offer tailored laundry solutions to provide our clients with an excellent return on investment. Full evaluation of laundry requirements are taken and a return on investment report issued to offer our clients a fully detailed cost analysis. This enables them to make informed decisions regarding their laundry operation.

Front Of House Systems

Offering the design and supply of front of house operations is important in providing the complete solution to our clients. If it is a small operation for impact or a large operation to offer your staff an area to relax, Edge DPM will work with you to create a unique and bespoke environment tailored to your requirements.

Industrial Refrigeration Units

Keeping cool in tough times and making the right choice for your operation is paramount to the way we work. From single product supply to full refrigeration packages we will work with you to provide a detailed proposal, planning for the future and the warmer climate we are now living in. Working with all leading manufacturers we provide a range of equipment to ensure you, and more importantly, your products stay cool under pressure.

Service & Maintenance

Our after sales service offers additional peace of mind long after your equipment has been supplied and fitted. Our national network of skilled installation teams and technicians provide local support when and where you need it for both catering and laundry facilities.

24hr Reactive Breakdown

Our team help diagnose the issue from the first call through to assigning the appropriate engineer. Whether it be for catering equipment, refrigeration equipment, warewashing, combination ovens or laundry's we ensure our clients' needs and expectations are met and the equipment is back operating as quickly as possible.

PPM Contracts

Planned Preventative Maintenance is critical in any busy operation. Tailored contracts to carry out preventative maintenance ensuring that the equipment is running as efficiently as possible is something that we work closely with our clients to achieve.

Gas Certifications Catering / Laundry

Annual gas inspections for both catering and laundry operations in line with current regulations are detailed and acted upon professionally. CO2 levels are recorded, and certifications issued to our clients. Compliance with IGEM/UP/19 – Design and application of interlock devices and associated systems used with gas appliance installations in commercial catering establishments.

Cost Asset Management

Asset management is a systematic process of developing, operating, maintaining, upgrading, and disposing of assets cost-effectively. We provide weekly reports on every asset on site detailing spend to date, thus allowing commercial decisions to be made on repair versus replacement. Forecasting for future requirements made simple.

Design

We take time and care when designing our clients facilities, working with you to combine our creativity with the practical constraints of your business.

Catering & Laundry

We work with our clients to identify, specify and supply the appropriate equipment to meet our clients' needs and budget. We will create a kitchen or laundry that satisfies your needs, aspirations and style. Within the design we will also aim to help you improve efficiency, sustainability and profitability. As standard in our drawing package we create 2D plans, elevations and 3D images to help you visualise your designs full potential.

We carry out ROI calculations based on outsourcing versus an OPL Laundry costs, feasibility studies to assess the impact of managing laundry services in-house and make recommendations accordingly.

BIM (Building Information Modelling)

BIM is a major part of today's construction industry; with an intelligent 3D model-based process that gives design professionals the insight and tools to more efficiently plan, design, construct, and manage buildings. As well as drawing all our Foodservice and Laundry designs in Revit we also offer our services to draw our clients 2D plans into a fully functional BIM model in Revit. No matter how large or small the project is.

Interiors

At Edge we offer an Interior Design service to help develop your front of house ideas as well as the back of house. Whether you're starting from scratch or refurbishing an existing public space, we can help you develop your concept into something functional, stylish and unique.

Installation & Project Management

Whether you are replacing catering or laundry equipment, are involved in a new build or a complete refurbishment these can be incredibly challenging logistically. We have the expertise to manage this process from start to finish keeping you involved throughout.

Site Survey

From a single product replacement to a full turnkey solution, we will carry out a detailed site survey. Our attention to detail means that every aspect of the process is managed effectively and efficiently resulting in a simple and time delivered project within budget.

Project Planning

Detailed knowledge of all regulatory requirements including Health and Safety legislation, regular communication and on-going support and advice are all key factors for a successful project. We provide a detailed project schedule in line with our clients' requirements. We strive to overcome any obstacles that we may encounter and give a clear and concise way forward.

Program of Works

For more detailed projects we will provide a program of works from point of delivery to full testing, commissioning and training. Any issues along the way will be highlighted and the program amended to suit, even if site is delayed we will work with our clients to ensure a smooth process.

Installation

Our installation teams work to the highest standards and are committed to delivering the same quality for a one-off product installation as a full turnkey solution. Once installed, training will be planned and delivered giving our clients peace of mind that they have the knowledge to run a successful business. Warranty and asset management then fall into place with our after-sales service team.

Our Process

01. Our Approach

Our expertise incorporates design, sourcing and installing professional equipment, we provide our clients with the solution they require, giving a return on investment and within budget.

Our Process

02. Our Engagement

We engage with the design brief using imaginative and forward thinking designs and ideas. Drawing on over 40 years experience to ensure the solution meets and exceeds the clients expectations, whilst working within the constraints of the project.

Our Process

03. Our Delivery

After working with the client throughout the design process, we can install and manage the project through to completion. We provide an after sales service for all aspects of equipment.
